# DURATRONIC TM SERIES

OPERATING INSTRUCTIONS

Coding is effected via the receiver board located inside the Gate Control Box - The Coding Link is next to the WHITE WIRE terminal *When not in use it sits on 1 prong only*

CODING REMOTES TO A RECEIVER

Connect power - Insert Link onto *TX Coding* prongs - transmit the button you want to activate the device on the new remote **LED** will flash once after coding new remote. *If the remote is already coded, the **LED** will flash twice If the memory is full, **LED** will flash three times* Continue coding remotes and when complete, Remove *TX Coding Link.*

DELETE INDIVIDUAL CODES

Remove power - Reconnect power Insert Coding Link onto *Erase Memory* Prongs Within 10 seconds, transmit with previous coded remote
After remote has been erased, the LED will flash once indicating that the operation is complete - Remove *Erase Memory* Coding Link from Prongs
Points must be repeated every time a single remote is to be deleted.

DELETE ALL CODES

Remove power - Reconnect power
1 - Insert Coding Link onto *Erase Memory* Prongs Count LED flashes and when count reaches 4, remove *Erase Memory* Coding Link
2 - Insert *Erase Memory* Coding Link and count LED flashes When count reaches 2, remove *Erase Memory* Coding Link
3 - Insert *Erase Memory **Coding Link*** and count LED flashes When count reaches 4, remove *Erase Memory* Coding Link
All remotes are now erased from the receiver Remove *Erase Memory* Coding Link
