

## PROGRAMMING:

### 1. Learning transmitter's codes:

Press "learn" for 1 second, the "learn\_led" light will illuminate, then, press and hold the button on the new remote until the "learn\_led" flash and/or goes out. Once the light has gone out then the transmitter's code has been stored. Please now stand clear of the door and test the remote.

NOTE: You can only code remotes to an individual Garage door. If this remote is for a main door in an apartment block you will need a technician to code as you will wipe all codes from other remotes.
