

Installing a receiver into your GDS800 motor

1. **TURN OFF POWER OF MOTOR FROM THE POWER POINT**
2. View the diagram below and ensure that it matches with the top of your motor.
3. Connect the black receiver cable to the left side terminal that is labelled WALL SWITCH by pushing the red tab, inserting the black cable and releasing the tab.
4. Connect the blue receiver cable to the left side terminal that is labelled COM by pushing the black tab, inserting the blue cable and releasing the tab.
5. Connect the brown receiver cable to the terminal that is labelled +24VDC by pushing the red tab, inserting the brown cable and releasing the tab.
6. Turn power back on and ensure the receiver powers up.
7. Your two new remotes have been pre-programmed to the receiver.
Press button 1 on your new remote to ensure it can operate the door.

WARNING

This product may contain a coin/button cell battery. Keep product and batteries away from children. A battery can cause severe or fatal injuries in 2 hours or less if swallowed or placed inside any part of the body. Seek immediate medical attention if it is suspected that a coin/button cell battery has been swallowed or placed inside of any part of the body.
